PROFESSIONAL SUMMARY

Curious and impact-driven technologist with a strong inclination toward building intelligent systems that solve real-world problems. Focused on Artificial Intelligence, healthcare innovation, and full-stack development, with hands-on experience building AI-powered healthcare platforms, disaster-response systems, and a custom-designed programming language. My work combines applied deep learning research – including published IEEE papers on medical imaging and disaster imagery analysis – with practical, production-ready engineering. I emphasize scalable system design, research-driven problem solving, and building technology with measurable real-world impact.

EDUCATION

UPES <i>Master of Computer Applications (MCA)</i>	2025 – 2027 <i>Dehradun, Uttarakhand</i>
UPES <i>Bachelor of Computer Applications (BCA)</i>	2022 – 2025 <i>Dehradun, Uttarakhand</i>
The City Montessori School <i>CBSE Higher Secondary School (Class XII)</i>	2022 <i>Basti, Uttar Pradesh</i>
St. Basil's School <i>ICSE Secondary School (Class X)</i>	2020 <i>Basti, Uttar Pradesh</i>

EXPERIENCE

Dalian University <i>Research Intern, under Prof. Deepak Jain</i> - Conducting applied research in artificial intelligence and deep learning under the guidance of Professor Deepak Jain. - Collaborating on model design and experimentation, contributing to ongoing academic research and publication efforts.	May 2026 – Sept. 2026 <i>Dalian, China</i>
IBM (Phemsoft) <i>Summer Intern</i> - Developed a Deep Learning-based Quality Control System for automated defect detection in industrial components. - Applied CNNs for real-time image analysis, improving accuracy and reducing manual inspection effort.	May 2024 – Aug. 2024 <i>Remote</i>
Rajiv Gandhi Institute of Petroleum Technology (RGIPT) <i>Intern</i> - Developed deep learning models for image caption generation using CNNs and RNNs. - Optimized models for higher accuracy and contextual relevance in real-world applications.	Dec. 2024 – Jan. 2025 <i>Amethi, India</i>
NIELIT (National Institute of Electronics & Information Technology) <i>Summer Intern</i> - Researched and explored applications of Artificial Intelligence and Deep Learning. - Gained hands-on experience with modern AI tools and neural network models.	May 2025 – Jul. 2025 <i>Gorakhpur, India</i>
Portwol <i>Marketing Intern</i> - Designed and published digital posters and social media content to enhance brand visibility on Instagram. - Mentored team members on policies and best practices, improving workflow efficiency and consistency.	Jan. 2024 – Jun. 2024 <i>Remote</i>

PROJECTS

AyurSync AI <i>Full-Stack + AI Project ayurcare-delta.vercel.app</i> - Developed an AI-driven Ayurvedic healthcare platform enabling diagnosis, doctor consultations, and wellness programs. - Built using Flask and SQLAlchemy with custom LLM integration, subscription and product-ordering modules, and WebSocket-based video consultations.
Institute of Computer Portal <i>Full-Stack Web Application institute-of-computer-portal.vercel.app</i> - Developed a full-stack web portal for a computer institute, featuring course listings, student information, and administrative content management. - Designed a responsive, user-friendly interface to streamline access to institute resources and information.

Hybrid Image-Based Wound Healing Analysis Using Entropy-Based Segmentation, Texture Features, and Optical Flow

IEEE CICN-2026 | Published Paper

- Co-authored a research paper presenting a hybrid image-analysis pipeline for wound healing assessment.
- Combined entropy-based segmentation, texture feature extraction, and optical flow analysis to quantify healing progression.

Human Presence Detection in Disaster Imagery Using Machine Learning

IEEE CICN-2026 | Published Paper

- Co-authored a research paper on an AI-based human/survivor detection system for earthquakes, floods, and fires using deep learning and computer vision.
- Demonstrated strong potential for real-world emergency response and disaster relief applications.

Neuro-lang

Custom-Built Programming Language | github.com/Manashbs/neuron-lang

- Designed and developed Neuro-lang, a custom programming language built from the ground up, including its own syntax and interpreter.
- Implemented core language components – lexer, parser, and execution engine – to support custom program constructs.

Osteoporosis Detection using X-ray T-Score Analysis

Research Project

- Developed an AI model to detect osteoporosis from X-ray images with automated T-score estimation.
- Utilized deep learning pipelines to support early diagnosis and reduce fracture risk.

TECHNICAL SKILLS

Programming Languages: C, Python, Java, JavaScript, MySQL, HTML, CSS, React

Frameworks & Libraries: TensorFlow, PyTorch, Keras, Scikit-Learn, Pandas, NumPy, OpenCV, Librosa, FastAPI

Tools & Technologies: Weka, Wireshark, PostgreSQL, OpenAI API, Claude, Google Gemini, OpenSmile, Praat, FDL, n8n

Concepts: Machine Learning (ML), Neural Networks, Generative AI, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Natural Language Processing (NLP), Language & Compiler Design, Web Scraping, APIs, Prompt Engineering, Computer Networks, DBMS, Operating Systems (OS)

ACCOMPLISHMENTS & RECOGNITION

- Hold certificates for various courses from Coursera and EDX.
- Participated in the AICTE Quantum Computing Faculty Development Program.
- Participation in MLTA 24 organized by NIT Kurukshetra.
- Drone Technology and Application Bootcamp – organized by NIT Kurukshetra.
- Participation in Hackathon 8.0 organized by the CSI Student Chapter, UPES.
- Participation certificate in Quantum Computing organized by IIT Kanpur.
- Participation certificate in AI/ML organized by IIT Roorkee.
